## WORK EXPERIENCE

---

### **Freelance Web Designer & Developer (Ongoing)**

- As a freelance web designer and developer, I specialize in creating modern, responsive websites tailored to individual clients' needs. From concept to deployment, I ensure intuitive user experiences, clean designs, and efficient functionality. My skills include front-end development, UI/UX design, and optimizing web performance for seamless browsing across devices.

### **Founder & Developer of Glide – Apple TV App (Ongoing)**

- I am currently developing **Glide**, an innovative web browsing application for Apple TV. This project has allowed me to explore **tvOS development**, user interface optimization for large-screen experiences, and integration of intuitive navigation controls. Glide aims to provide a **smooth and user-friendly web browsing experience** on Apple TV, pushing the limits of its ecosystem.

**IT Support Specialist** Vigilant Medical Service Inc. Brookhaven, PA

April 2020 - Present

- Resolved escalated issues by serving as a subject matter expert on a wide range of IT problems.
- Created help desk tickets, troubleshoot, and resolved desktop issues efficiently.
- Managed backup and recovery of data assets to ensure system availability and security.
- Installed and configured software, granted permissions, and set up hardware for new employees as part of the onboarding process.
- Diagnosed hardware and network system issues using proactive troubleshooting techniques.
- Assigned system permissions and configured computers to streamline the onboarding process.
- Updated software regularly to safeguard against security vulnerabilities.
